

# TOGAF 8 Enterprise Architecture Course Leading to Certification by the Open Group

## Objectives

The course is aimed at providing a thorough understanding of the concepts and principles of Enterprise Architecture in general and the Open Group TOGAF 8 framework and Architecture Development Method (ADM) in particular. For successful candidates, it results in certification as an accredited TOGAF 8 Architect.

## Prerequisites

Candidates should have several years general experience and exposure to I.T. Prior knowledge of Enterprise Architecture is an advantage.

## Format and Duration

This is an instructor led course, backed by a case study and engaging students in individual and group assignments.

The course duration is four and a half days.

## Location

Currently offered in Cape Town, Johannesburg and London, UK.

## Content Overview

The content includes:

- Concepts of and need for Enterprise Architectures
- Principles of EA and available frameworks
- Architecture principles and goals
- Architecture Components and framework coverage
- Architectures in the organization – Establishing Architecture Capability and Governance
- Business Architecture and Requirements
- TOGAF Architecture Development Method
  - Architecture Phases
  - Architecture Activities
  - Architecture Deliverables and Viewpoints
  - Examples of Business Process, Information, Applications and Technology Architectures
- Architecture Building Blocks
- The Enterprise Continuum and the role of a repository
- The Technical Reference Model
- Architecture Skill Requirements
- Architecture compliance and maturity
- Meta Models and Tooling to practically achieve architecture benefits
